

EXPERTISE IN CREATING CERAMIC FOR LAST 18 YEARS

We are introducing a concept of architectural surfaces from our experience of 18 year in manufacturing with the sizes of 600x600mm, 600x1200mm and 800x1600mm that goes beyond traditional ceramics: it allows designers to reinvent design criteria, giving them the utmost freedom and minimal constraints.

The lower weight of the individual tile is a logistical advantage for transportation and handling at the building site, and a practical advantage in special contexts, such as laying over existing surfaces, the shipping industry, and the field of furnishing.

THE SUSTAINABLE LIGHTNESS OF MATTER.

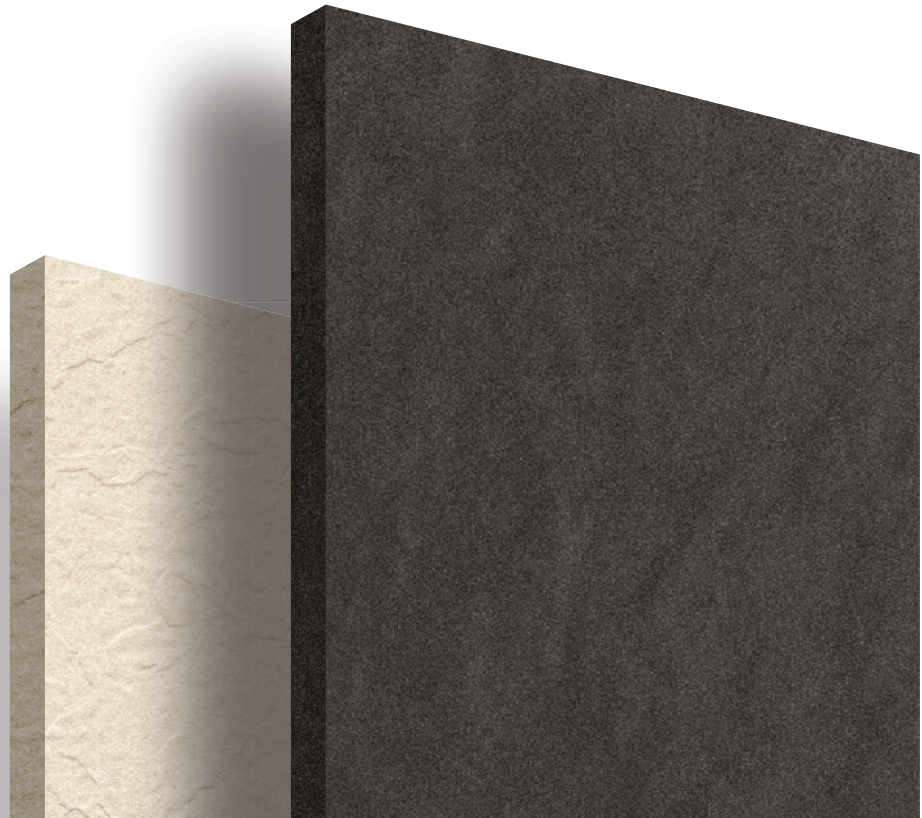

In this innovative Full Body Vitrified Tiles, we use materials that combines the established, classical characteristics and making a top of the range porcelain stoneware, with new advantages and high technical performance: lightness and versatility.

SOLUTIONS FOR ARCHITECTURE WITHOUT LIMITS.

Our Tiles are ideal for covering any surface: thanks to its Full Body, ease of installation (cutting, drilling, grouting, etc.) and maintenance compared with traditional ceramic tiles, our full body tiles are especially recommended for installation on floors and wall coverings, in residential and business settings, both interior and exterior.

Through applications that take advantage of the structural features of the tiles in terms of solidness and size, it is possible to revamp the interior walls and floors of any building, ensuring their correct thermal insulation and a distinct aesthetic improvement.
